SPARQL

Machine learning

LANGUAGE

Norwegian

English

ABOUT ME

I finished my Master's degree in information science desember 2023, and I am now looking to expand my knowledge with relevant work experience. While my main expertise lies in programming with Python, I have some previous knowledge of HTML, CSS, Javascript, R, SPARQL and SQL. I also have some experience with machine learning through university courses and basing my Master's thesis around large language models. I'm willing to work frontend, backend and full stack, while the two latter are preferred.

While I do have a 3 month notice period with my current employer, I would still be able to start working for your company as soon as possible given some flexibility on Tuesdays and Wednesdays. My work hours on Obs! Bygg, Lagunen are Tuesdays and Wednesdays from 16-21, and every other Saturday from 10-18. If it's possible to work around these hours, there should be no problem on my end to start before the 3 month notice period is finished.

From my employment in customer service I have learned to handle several tasks simultaneously. Managing customer follow-ups and warranty claims during the peak season can be exceptionally stressful. The influx of customer inquiries and concerns can significantly escalate, demanding swift and accurate responses to ensure satisfaction.

My coworkers often identify me as a cheerful and forthcoming team member. I strive to maintain a positive and approachable demeanor, fostering a collaborative atmosphere and making it easy for others to engage with me.

WORK EXPERIENCE

○ 2014-2024
Obs! Bygg, Lagunen - Laguneveien 19 5239 Rådal
Store Employee

I was working close to full time while evaluating the possibilities for my future. When i started my Bachelor's degree in Information Science I stepped down to a 33% employment, and this is also the position I have today at the company.
